

MyHotspotter for Windows Installation Guide

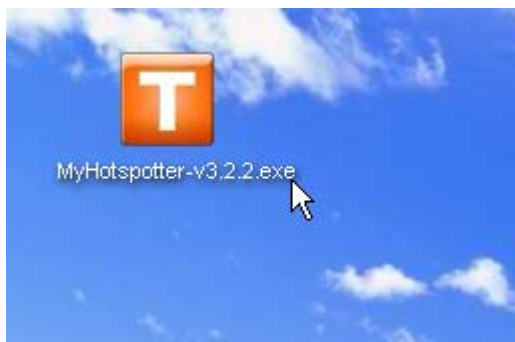

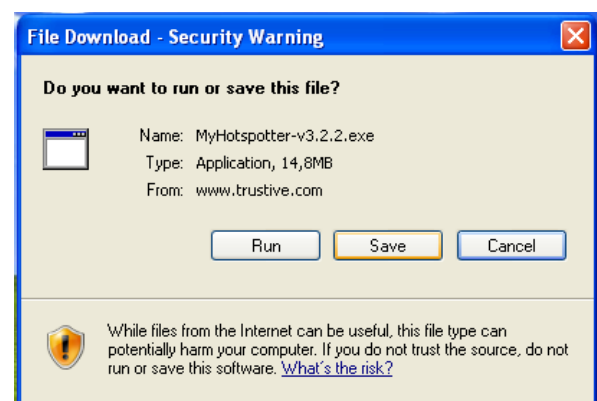

1) Download MyHotspotter

Download MyHotspotter for MacBook by going to <http://www.trustive.com/myhotspotter/windows/download> or by clicking on the corresponding download link on www.trustive.com.

The download should only take 1 - 2 minutes.

2) Save MyHotspotter

Save the installation file to your desktop.

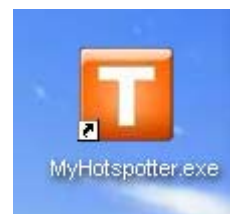

3.) Install MyHotspotter

Double click on the installation file icon that will have appeared on your desktop. The installation will happen automatically.

3) Launch MyHotspotter

Double click on the MyHotspotter application icon.

4) Enter your Trustive credentials

On first use, you will need to enter and save your Trustive credentials in MyHotspotter. To do this, click on the Account icon, type in your Trustive username and password in the corresponding boxes and then click "save".

5) Connecting to a Trustive hotspot

All available hotspots (WiFi networks) are listed in the "Available WiFi" box and Trustive hotspots will be identified with the Trustive logo. To access a Trustive hotspot, simply double click on the hotspot.

You are now connected and ready to use the internet.

6) Disconnecting from a Trustive hotspot

When you are ready to disconnect, simply click on the red cross icon in order to log out.
